Code Java

```
1 class Solution {
2     public int lengthOfLastWord(String s) {
3         s = s.trim();
4
5         int length = 0;
6         for (int i = s.length() - 1; i >= 0; i--)
7             if (s.charAt(i) != ' ') {
8                 length++;
9             }
10    }
```
